★★★★ GET SET UP ★★★★

MAKE YOUR OWN ANIMATIONS WITH **Aardman ANIMATOR**
Download on the App Store
GET IT ON Google Play
FREE

It's really easy to set up a simple animation studio at home.

BACKGROUND
A sheet of white paper makes a very simple white cove background, or you can draw a background scene.

MODELS
You can make your models out of absolutely anything.

LIGHTING
Get a desk lamp and aim it at your characters.

ANIMATION SOFTWARE
There are lots of different options when it comes to animation software. The Aardman Animator app is great for making stop motion animation. It's free to download from the App Store and Google Play.

TOP TIP
★★★
With most animation apps you touch the screen to capture a frame. To stop your device moving around, stick it to the table with sticky tack.

DEVICE
You can make animations on most phones and tablets. The Aardman Animator app is available in both iOS and Android.

STAND
You need to prop your device up to animate but you don't even need a proper stand, you can use a tin can. Make sure you don't obscure the camera view with the tin can.

TABLE
The co-founders of Aardman created their first animations on a kitchen table. You can do the same – just make sure you won't be interrupted by dinner!
